

PRODUCT DATA SHEET

SALINE NASAL SPRAY - ISOTONIC STERILE

NBE: Simply Saline

Isotonic Sterile Saline Nasal Spray is a non-alcohol based sterile epidermal solution designed to be sprayed directly into the nose to flush, clean and provide sinus relief. The specific mechanical pressure of spray and atomization level provides gentle cleaning and hydration of the nasal cavity.

Isotonic Sterile Saline Nasal Spray contains an equivalent level of electrolytes found in cell tissue. This ensures no constituents are carried or transmitted through the cell wall either into or from within the cell. Product is purely sterile prior to use with no risk of bacterial contamination. The solution, in combination with the componentry provides synergy between the pressure and atomization ensuring a pure flush that removes all materials that promote infections and impede healing.

Isotonic Sterile Saline Nasal Spray contains the following ingredients:

- Purified Water to USP Standard.
- Sodium Chloride to USP Standard.

Isotonic Sterile Saline Nasal Spray does not contain any preservative, allergens or potential skin irritants.

- Non Stinging.
- Non Irritating.
- Nonflammable and powered by air only.
- BOV Continuous Spray: High level of atomization for deeper penetration and can spray at any angle.

Isotonic Sterile Saline Nasal Spray is made in accordance with US Pharmacopeia Standard, 39th Edition of National Formulary 24th Edition
