

Product Data Sheet

Tan 10 Dry Oil Tanning Spray Reef Friendly

Tan 10 Dry Oil Tanning Spray is an Oxybenzone free product. Oxybenzone has been cited by the EWG (Environmental Working Group) as a hormone and endocrine disrupter and is restricted in many markets around the world. Further, NOAA (The National Ocean Service) has sited that Oxybenzone is highly toxic to coral reefs causing bleaching and die offs.

Tan 10 Dry Oil Tanning Spray is a highly effective tan control product designed with consumer and environmentally friendly constituents. This product was designed to mitigate and slow down the tanning process for those that have a higher Melanin level and appropriate skin tone that desire a tan. This allows one to develop a uniform tan with more control while reducing the risk of burning quickly.

Tan 10 Dry Oil Tanning Spray is light weight, film forming and tanning lotion provides water resistance up to 80 minutes and applies and dries clear. This sheer product utilizes a leading edge copolymer that is a film former but is permeable, allowing the skin to breath. Powered by air, this non-flammable propellant Bag on Valve continuous spray product sprays at any angle.

- Light weight quick drying
- Water resistant up to 80 minutes and no-rub application

Tan 10 Dry Oil Tanning Spray contains the following ingredients:

- Homosalate: UV-B Absorber
- Octisalate: UV-B Absorber
